

REMARKS

Examiner Tang telephoned the undersigned to discuss the present application. Examiner Tang explained that the application could be placed in allowable form by adding language which would negate possible further interpretations delaying otherwise allowable claims. Examiner Tang suggested amending Claims 74 and 104 to incorporate the subject matter recited in Claim 99, and amending Claims 75 and 105 to include the subject matter of Claim 93.

Upon considering the Examiner's proposal, the undersigned telephoned Examiner Tang and explained that the independent claims should be worded to encompass the adhesion modifying layer modifying the adhesion of the RFID integrated circuit or the electrical coupling circuit so that the RFID integrated and/or the electrical coupling circuit is modified if the RFID integrated circuit module is removed from the second substrate to thus indicate tampering of the RFID tag. The undersigned proposed the claim amendments presented in this Supplemental Amendment, and Examiner Tang indicated that such amendments place this application in condition for allowance.

Early and favorable action concerning this application is respectfully requested.

Should any questions arise in connection with this application or should the Examiner believe that a telephone conference with the undersigned would be helpful in resolving any remaining issues pertaining to this application the undersigned respectfully requests that he be contacted at the number indicated below.

Respectfully submitted,

BUCHANAN INGERSOLL & ROONEY PC
